

UNIVERSITÀ  
di **VERONA**

Corso di Dottorato in  
**INFIAMMAZIONE,  
IMMUNITÀ E CANCRO**

# SEMINAR

**FULVIA VASCOTTO, PhD**

**TRON – Translational Oncology at  
the University Medical Center of the  
Johannes Gutenberg University  
Mainz, Germany**

Date

**29 April 2026**

**Aula Vecchioni, Lente didattica**

Time

**At 2:00 pm**

## **mRNA BASED CANCER IMMUNOTHERAPIES**

Immunotherapies based on mRNA vaccines in combination with standard of care (as local radiotherapy, chemotherapy, check point inhibitor and antibody therapies) are the focus of our studies in several pre-clinical cancer models. We elucidated cellular and molecular mechanisms involved in the synergistic therapeutic effects characterizing the composition, the phenotype and the role of immune system systemically and in the tumor niches.
