

XLI Congresso Associazione Italiana di Cristallografia (AIC)

Verona, Polo Zanotto
11-14 September 2012

Lectio Magistralis

Gebhard F.X. Schertler - Paul Scherrer Institut Switzerland

MS1: Molecular recognition at the organic-inorganic interface

Giovanni Valdrè

MS2: Structure and microstructure by powder diffraction

Paolo Scardi

MS3: Crystal engineering and supramolecular interactions

Alessia Bacchi

MS4: Approaching protein structure by crystallography and complementary techniques

Luigi Vitagliano

MS5: New frontiers in crystal chemistry

Monica Dapiaggi

MS6: Morphological and dimensional control in crystal growth: theory and applications

Marco Bruno

MS7: Innovative methodological developments for crystallography

Angela Altomare
