PRION 2026

10-14 November

Palazzo della Gran Guardia

Verona - Italy

SISSA

NeuroPrion

Welcome Message

Dear Colleagues, Dear Partners,

We are pleased to invite you to support Prion 2026, the upcoming edition of the International Conference on Prion and Protein Misfolding Research, which will take place in the beautiful city of Verona, Italy, on November 10-14, 2026.

For more than two decades, the Prion Conference has brought together leading scientists, clinicians, industry partners, and young investigators to advance our understanding of prion biology, neurodegeneration, protein misfolding mechanisms, and related diseases.

The 2026 edition will continue this strong tradition by offering a vibrant scientific program featuring cutting-edge research, keynote lectures by internationally recognized experts, thematic sessions, poster presentations, and multiple opportunities for scientific exchange and collaboration. With participants joining from all over the world, Prion 2026 represents a unique platform to showcase your contribution to this dynamic and rapidly evolving field.

Your support will help us ensure an outstanding meeting experience and will contribute to fostering new ideas, innovative research, and future collaborations within the prion community. We are committed to offering high visibility to our sponsors through a range of customizable opportunities.

We look forward to welcoming you to Prion 2026, and to working together to make this conference an inspiring and memorable event.

Warm regards,

The Organizing Committee of Prion 2026

Prof. Gianluigi Zanusso,
University of Verona
Italy

Prof. Emiliano Biasini,
University of Trento
Italy

Prof. Giuseppe Legname,
SISSA, Trieste
